

Hey all you GFLs out there,

Mulch sent word a few days ago that Chris Kampe, one of our C-26 pilots from the early 80s passed away in early July. No other info except that his sister from Eureka picked up his ashes and took him up north.

This is all I could find on his passing. If any of you have, or can find more information on Chris please let me know. Also, does anyone have a picture of Chris or of a Fresno C-26?

Thanks to all,
Aileron

I am sorry to hear about Kris' passing. I did not know him well, but remember him as a good fellow. Y'all please share some of your thoughts and/or experiences you had of anything you recall about him.

RIP.

B.O.B.

Chris was a good man. I have very fond memories of Chris and I flying the Maule M-4, which he bought from me, getting tailwheel practice.

Joe Leadingham

Great memories of Chris as a pilot, an officer and a first-class guy. R. I. P.

Chris was a great guy,
It's sad news. He want that old does anybody know any details?
Sparky

Chris was a great guy and fun to fly with. He was dying to fly the F-16. He was a brand new left seater in the C-26 and I was a not-so-sharp right seater when we had a little trip to LA to pick up some state MIFWIC's. We successfully got that silly thing down there and back and giggled at how inexperienced us two were. Nickel for Chris.
